None of the over 20 adult residents of our town whom I have spoken to about this measure in the last three months , other than my two fellow BOH members, is in favor of this resolution. It is governmental overreach. It is aban that could expand to other adult choices,potentially eroding personal liberties.Education and smoking cessation programs are far more effective to a prohibition style program that would easily be circumvented.

The need to improve alcohol abuse education in our town is far more pressing . Alcohol has a far larger negative effect on the health of our townspeople than does the current already largely reduced use of tobacco. The Massachusetts legislature has already taken up this issue and for months has failed to find any further legislative sponsors other than the initial filers. The effect on our two main local retail businesses will also be felt with the passing of this wrong-headed initiative.
