The Board of Health vote on advancing this initiative was not unanimous. I, Stephen Kruskall, a three term elected member voted against this measure. Below are three reasons why.

None of the over 20 adult residents of our town whom I have spoken to about this measure in the last three months , other than my two fellow BOH members, is in favor of this resolution. It is governmental overreach. It is a ban that could expand to other adult choices, potentially eroding personal liberties. Education and smoking cessation programs are far more effective to a prohibition style program that would easily be circumvented.
