

RCAP Solutions Webinar: Climate Resiliency and Emergency Preparedness for Private Wells

Workshop Description:

This free, one-hour webinar is intended for private well owners, water professionals, public health officials, and other stakeholders interested in protecting private water systems. As climate change increases the frequency and intensity of extreme weather events, it's essential to understand how these changes can impact private wells and groundwater quality.

The session will cover the effects of climate-related hazards such as flooding and drought, strategies to improve well resiliency, and how to prepare for water-related emergencies. Attendees will gain practical tips on well maintenance, risk reduction, and emergency planning, along with resources to support long-term water security.

Thu, September 18, 2025 • 3:00 PM – 4:00 PM
Virtual
