Water Operators: Approved for 1 TCHs

Water Operators: Approved for 1 TCHs

Anyone from these 2 states can attend any of the sessions and will earn TCHs.

Workshop Description

Hydrants are an important feature of water system asset management plans and GIS mapping data. How do you assess their condition and age? This webinar will be taught from the experience of completing many drinking water asset management projects, working with firefighters and planning asset replacements.

What topics will be covered at the workshop?

- Assess the condition of a hydrant from a visual inspection
- How to determine a hydrant's age if the date stamp is hidden or does not exist
- Various ways to log data
- Review various popular styles of hydrants by decade and manufacturer
- How Hydrants help date other assets

Questions? Contact: training.tristate@rcapsolutions.org

Before the workshops, please review the attached [guidelines of attendee participation](#) for earning TCHs.

These workshops are made possible by funding through the US EPA.
