Subject Re: Nicotine Free Generation Policy

Peter,

Thank you for sharing this, I really appreciate you reaching out. I will pass this along to my Board members. We will be discussing this Monday evening at our BOH meeting, I would encourage you to join if you are interested. It will be at 6:30 PM via zoom and the meeting info can be found on the town website.

I am writing in opposition to the proposed Nicotine Free Generation policy. We saw during Covid how anxious the government and medical authorities were to impose draconian measures on the population despite not really having the appropriate policy measures and not knowing the science. Doctors who prescribed ivermectin and hydroxychloriquine were mocked and faced with challenges to their licenses - despite the fact that both remedies were effective. In some cases vital transplant surgery was denied to the unvaxxed. Military personnel were fired for refusing the shot. Thank God roughly 30 percent of the population refused to take the shot, creating a pool of unvaxxed Covid shot people for studies compared to the vaxxed. We know now what many suspected - the shot was neither safe nor effective.

Authorities need be careful not to let their positions be used to impose draconian measures on the population which is capable of making its own decisions for themselves and their bodies. Totalitarianism and government overreach is wrong.

Sincerely,
Peter D. Laird Sr.
