The purpose of this webinar is to highlight the critical role that Capacity Development plays in the resilience of community water systems. The presentation discusses the importance of promoting capacity development and the main concepts related to this effort. In addition, experiences are shared with the impact on the communities in the technical, administrative, and financial areas, from their daily operations as well as in times of urgent need, like after natural disasters. Tropical storms, hurricanes, and earthquakes are common and typical threats all year long in the Caribbean and now all around the world.

Finally, suggestions and recommendations are provided that might facilitate the process of assisting a community to develop its capacity. This webinar is funded under RCAP's EPA NPA 1 23-25 grant.

The presenter of this webinar will be Carmen Yolanda Montañez-Velázquez, Community Specialist, RCAP Solutions.
