

MHOA Summer Webinar: Nicotine Free Generation - RN CEU Request

Program title: Nicotine Free Generation

Date and time: July 11, 2024 from 1pm to 2pm

Location: Zoom webinar

Description:

Nicotine Free Generation replaces the minimum age sales law on tobacco and vape products. It provides that anyone who is 21 years of age or older on a designated date may continue purchasing nicotine products, but for anyone younger than 21 on that date and the municipality would be nicotine free now and forever. How did this groundbreaking policy come about in MA and what are the recommended steps if your municipality is interested?

Presenters: Chris Bantin, Program Director at the Public Health Advocacy Institute, and Maureen Maureen Buzby, Tobacco Prevention Coordinator for seven Mystic Valley municipalities

Learning Objectives:

At the end of this training program, participants will be able to:

- Describe how the Nicotine Free Generation policy will advance tobacco use prevention
- Describe the process and advocacy strategies for passing a local policy

Audience: Local public health department staff

RN CEUs requested: 1
