WEBINAR

Optimizing the power of AI & FirstNet for public safety

Artificial Intelligence (AI) & FirstNet are changing the landscape of public safety communications. Working in concert, these tools will not only help first responders and the public safety community, but exponentially increase the efficiency and accuracy

of mission-critical responses.

Join Michael Barnbeck, Deputy Executive Director of the PSBTA, and Stephen Devine, Chief Technology Officer of APCO International, as they delve into the wide world of AI. Specifically, they will discuss what is AI, how does AI integrate with public safety broadband, explore use cases where AI has been successful, and the importance of FirstNet reauthorization to the expansion and evolution of AI.

WEBINAR

How FirstNet Deployables Can Help You During a Disaster

When a disaster hits, FirstNet helps your organization stay connected to ensure you have access to voice and data when it matters most. From Compact Rapid Deployables (CRDs) to Cells on Light Trucks (SatCOLTs) and Cells on Wheels (COWs), the FirstNet Response Operations Group (ROG) has more than 180 dedicated deployable network assets to assist public safety and communities.

Join Chief Jeff Johnson (Ret) and Fred Scalera, Director of Program Management and the Response Operations Group for the FirstNet Program at AT&T, as they discuss how to request assets, the capabilities of the various assets, suitability of deployables for incidents, and much more!

PODCAST

FirstNet and the 4.9 GHz Spectrum.

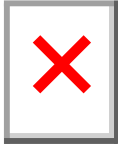

This episode dives into the critical evolution of public safety communications, focusing on the recent FCC decision to establish a nationwide Band Manager framework for the 4.9 GHz spectrum, and discuss the evolution and deployment of the FirstNet System. Host Chris Tubbs interviews Chief Jeff Johnson, a leader in public safety technology and the development of FirstNet. Together, they explore the history, governance, and transformative potential of FirstNet and the 4.9 GHz spectrum in enhancing public safety operations with emerging technologies like AI, 5G, and augmented reality. The discussion emphasizes the importance of protecting and optimizing public safety spectrum, the lessons learned from past advocacy efforts, and a call to action for public safety leaders to remain engaged in ensuring the spectrum's effective use and governance.
